

Emergency Administration & Planning

2016-2017 Catalog Year

The Emergency Administration and Planning (EADP) degree was the first of its kind in the United States. Students in the EADP program learn the causes and consequences of natural, technological and conflict disasters. The program also prepares students to work as emergency managers at the local, state and federal levels; risk managers or continuity planners for businesses and corporations; and as disaster specialists for the American Red Cross and other non-profit organizations. Students may also work in the homeland security or several humanitarian organizations. Check out the program's web site at www.padm.unt.edu/eadp for information about the degree requirements, curriculum, internships and upcoming events. The PACS Office of Student Services assists students with degree planning.

The Bachelor of Science degree in Emergency Administration and Planning from the University of North Texas consists of 120 college credit hours. The degree requires 42 hours of general academics, 48 hours in the major, a required 18 hour minor and 12 or more hours of general elective hours to complete the minimum degree requirements.
