Criminalistics Certificate
Catalog Year 2015-2016

Criminalistics involves the recognition, preservation, collection and examination of items of physical evidence, such as firearms, ammunition components, footwear impressions, fingerprints, hairs, and fibers, found at crime scenes. The criminalistics certificate program at UNT is an 18 semester hour program in which students learn how to recognize, document, and collect items of physical evidence. Additionally, students are taught what the capabilities as well as the limitations are of criminalistics laboratories that ultimately analyze the physical evidence brought to them by scene investigators.

The criminalistics certificate program is specifically designed for future field investigators (CSI), detectives, and police administrators. Other who can potentially benefit from the program includes future prosecutors, criminal defense attorneys, journalists, emergency room nurses and physicians.
